AQUARIUS

A HIDDEN OCEAN IN MIXED REALITY

SECRETMAP

October 2018

CONCEPT

CONSCIOUSNESS

Exploration of inner human consciousness through multi-sensory media inspired by the ocean and deep space. Aquarius is a blissful oasis hidden within the depths of Earth’s oceans - a portal to the aquatic and cosmological unknown.

INSTALLATION

A **monolith** (think 2001: A Space Odyssey) filled with LED panels displaying a narrative cycle about an adventure inward.

Depth sensors change the visual and sonic behaviors of it through audience interaction.

AR interactions simultaneously shift the sensory experience.

FEATURES

Monolith
set design

LED Panel
visuals

Aromatic Diffusion
with essential oils

Hi-Fi
spatial audio

Augmented Reality
Interactions

CORE FEATURES

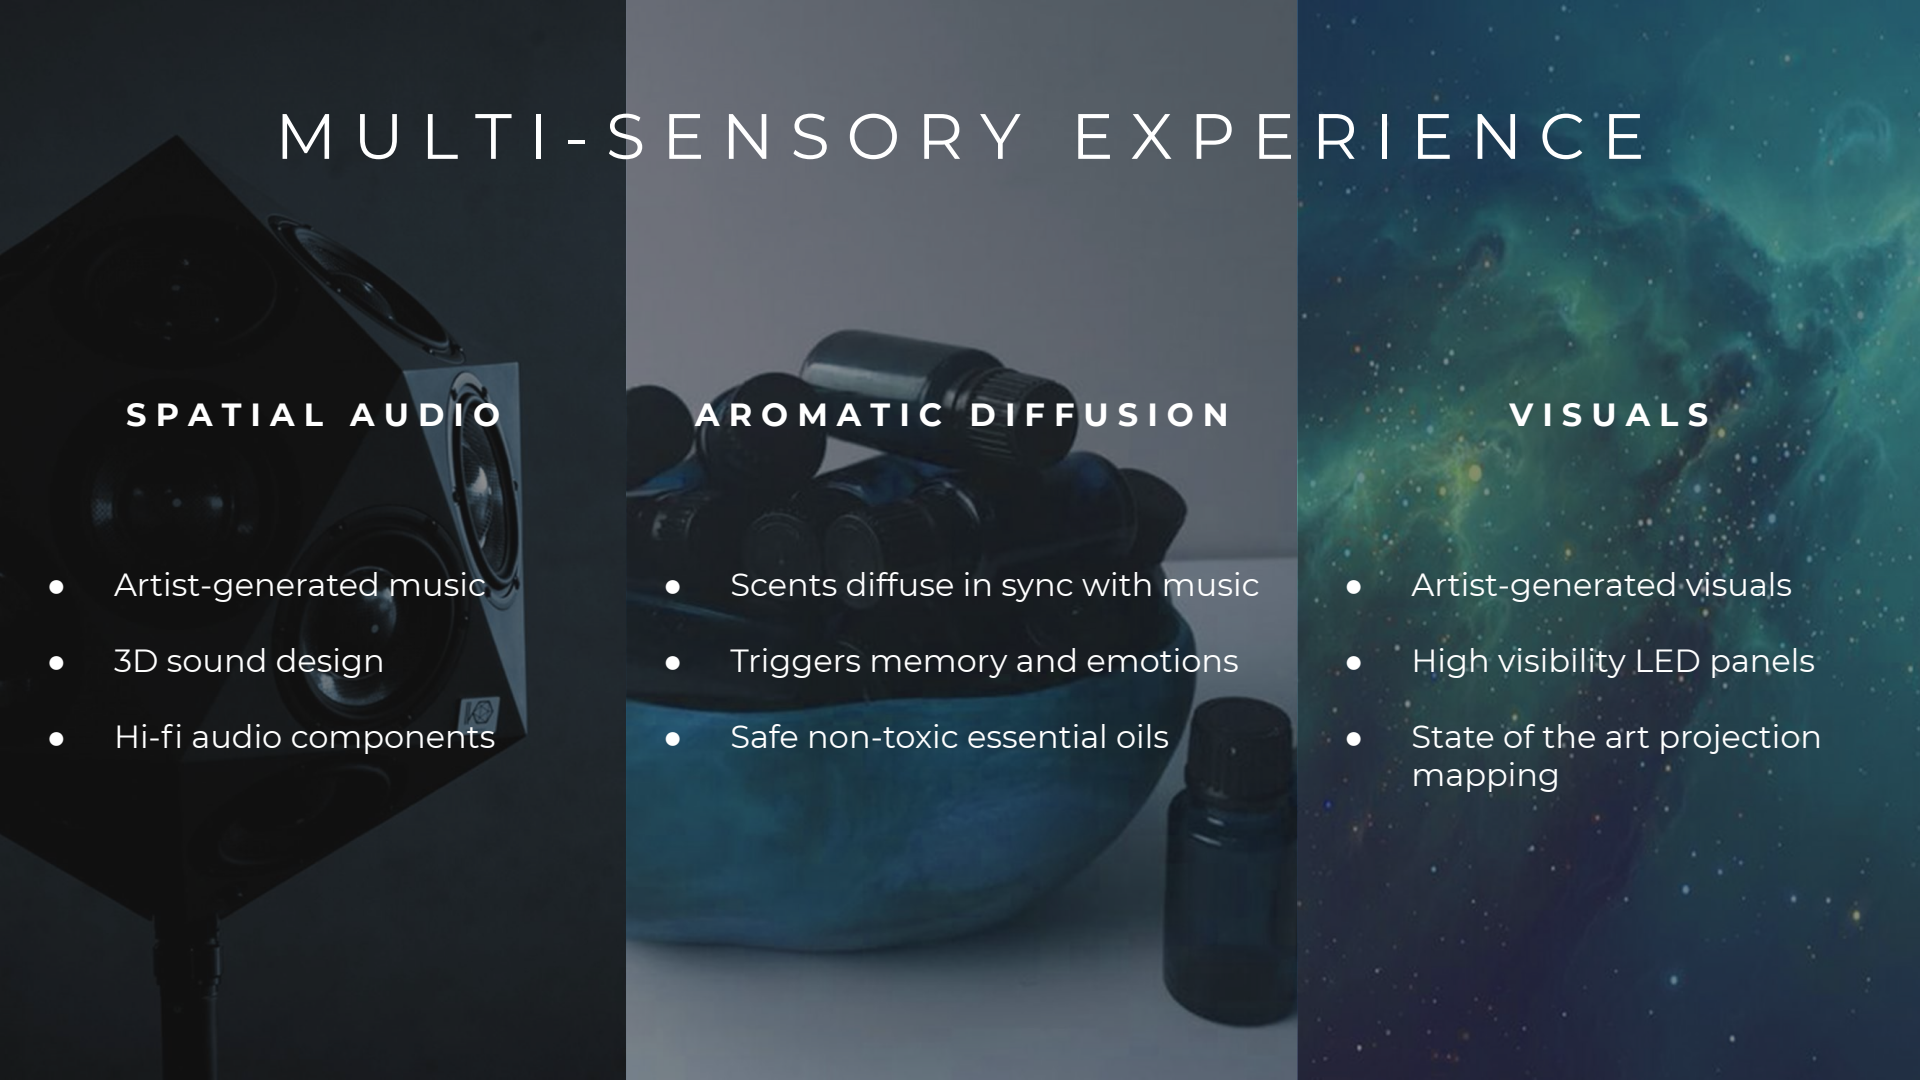

SET DESIGN

- Immersive cosmo-aquatic world
- Multi-user experience
- Interactive attributes
- Modular space-saving design

AR EXPERIENCE

- Users generate bioluminescent life & celestial objects
- Visuals sync with music in real time
- Networked experience
- Users represent deities from this world

MULTI-SENSORY EXPERIENCE

SPATIAL AUDIO

- Artist-generated music
- 3D sound design
- Hi-fi audio components

AROMATIC DIFFUSION

- Scents diffuse in sync with music
- Triggers memory and emotions
- Safe non-toxic essential oils

VISUALS

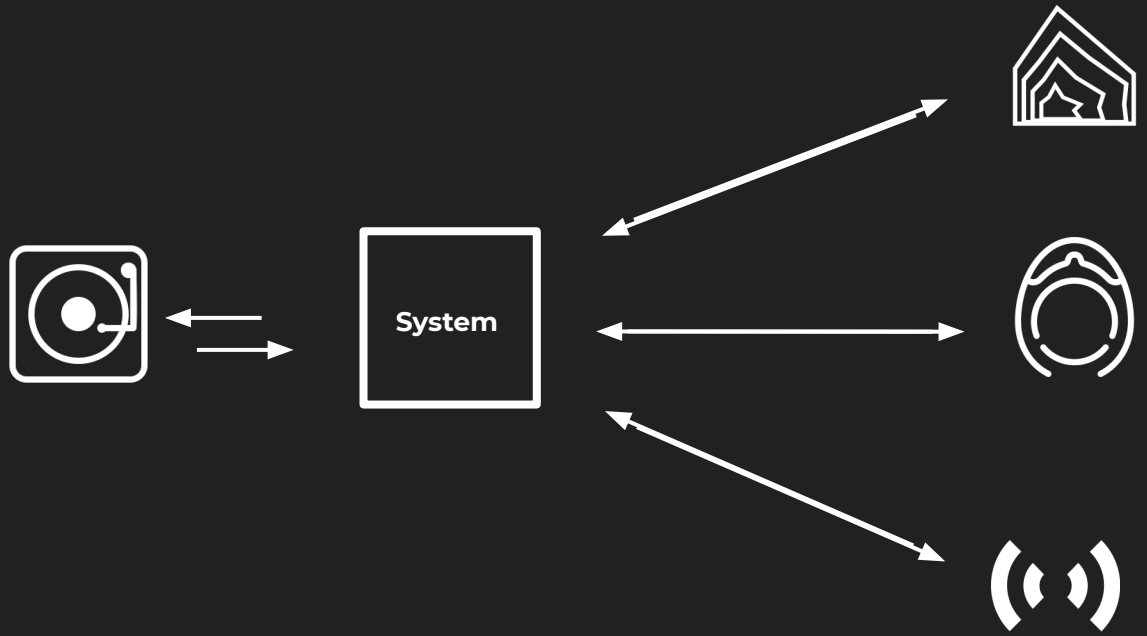

- Artist-generated visuals
- High visibility LED panels
- State of the art projection mapping

DESIGN
DEEP OCEAN

DESIGN
DEEP SPACE

EXPERIENCE ARCHITECTURE

Custom narrative systems allow for seamless integration and interaction between media modalities.
